Continuation of Substance of Interview including description of the general nature of what was discussed: Examiner and Mr. Swift agreed on changes to the specification to ensure that it coincides with the drawings and that the terms in the specification coincide with those set forth in the claim language, changes to the drawings to clearly show claimed portions of the handle arrangement, and changes to the claims to ensure claim language consistency.

In order to more clearly define the invention, it was also agreed to include in claim 1 that the engagement of the brake pad is with the outer surface of a tire of the at least one of the two rear wheels of the wheelbarrow and that the second end of the brake tension spring is directly connected to one of the two rear wheel brackets.
